Forceful Laxatives Are No Longer Necessary

If you are accustomed to using forceful
laxatives as cathartics you can break
away from this habit and bring back
the bowel action to a normal condition,
or easily so, by the use of

Wampole's MAGNOLAX

In appearance and taste Magnolax is pleasant and
palatable. It is a subtle combination of Mineral
Oil with Bulk, or Magnolax—containing the
essence of bulk. It softens and lubricates the
intestines of the bowels, causes natural excre-
tion without discomfort or griping.
Wampole's Magnolax mixes readily with milk,
and may be given in this way to infants and very
young children.
8-oz. Size, 50c. 20-oz. Size, \$1.00.

The Kodak Way

WHETHER you're dishing the
south lot, taking a Sunday trip
or stealing time to fish, today's
Kodak snapshot is to-morrow's
picture-record.

For in addition to the print that
keeps the story there's the date and
title you wrote on the film at the time
—information you want for reference.
All the Kodaks have this exclusively
Eastman, autographic feature.

Mrs. J. McGillivray.

Miss Pauline Warman, of Chil-
mark, left on Wednesday for Cal-
gary.

Mrs. R. Fraser and children, of
Naco, left this morning for Allan,
Sask., en route for London, Ont.

Membership Campaign Under Way

The drive for the sign-up of the
Second Series of Wheat Pool con-
tracts is under way and meeting
with splendid response. A Wheat
Pool Rally was held in Calgary pre-
vious to the commencement of the
campaign. The Pool delegates,
members of parliament, representa-
tives of urban centres, and others
attended this gathering. Addresses
were delivered by Premier Gardiner
of Saskatchewan, Premier Brown-
lee, of Alberta, Hon. R. B. Bennett,
K.C., M.P., Senator Buchanan, of
Lethbridge, Mayor Bury, of Ed-
monton, Mayor Osborne, of Cal-
gary, and C. O. Smith, editor of
The Calgary Herald. In a series
of splendid speeches these men
urged that the Wheat Pool move-
ment be given generous support, in
the best interests of all Alberta.

Premier Brownlee predicted suc-
cess in the drive because of the
great improvement in Alberta's
prosperity following the formation
of the Wheat Pool. Premier Gar-
diner predicted that those who
looked for the Saskatchewan Pool
to fail were in for a serious dis-
appointment. Hon. Mr. Bennett said
that the failure of the Alberta Pool
to obtain a large sign-up would put
agriculture back fifty years in this
province.

Appreciation of Travelling Clinics

Letters continue to come into
the Department, announce Hon.
Geo. Headley, Minister of Health,
expressing appreciation of the
splendid work being done by the
Travelling Clinic under the charge
of Dr. R. F. Washburn, which is
bringing medical service to many
outlying communities. Mrs. R.
Clarke Fraser reports that at Naco
operations were performed on
over thirty children and many in
addition were given dental atten-
tion and prescriptions for glasses.
Results indicate, states Mrs. Fra-
ser, that this service is one of the
greatest the government has ever
undertaken.

At the four points visited to
date since May 15 a total of 80
operations have been performed,
284 consultations have been held
and 130 dental treatments have
been given. Requests are being
received from many other districts
for the services which the clinic is
rendering.

Fine Crop Weather

Fine crop weather prevails
throughout the Chinook district.
Warm days and cool nights with
occasional heavy showers of rain
has been the order of the weather
man for the past week. Wheat is
of heavy growth and in some fields
six inches high. There is every
indication of a bumper crop in
this district this year.

TENNIS TOURNAMENT

The Chinook Tennis Club are
putting on a tennis tournament
in which about thirty members are
competing. The committee are
expecting that the finals will be
played off on the day of the Jubilee
celebration Friday, July 1st.

Cooley Brothers are expecting
another shipment of Fordson
tractors to arrive here next week.

Sub-District

Wheat Pool Meetings

To perfect the Organization for the campaign for the
signing of the Second Series of Wheat Pool Contracts Meet-
ings will be held at places and on dates given below.

Farmers and townspeople are requested to attend
these meetings.

A director will be present at the majority of these
Meetings and will outline the plan of campaign.

Canada's Diamond Jubilee

Only once in the history of any nation does the opportunity come to its people to celebrate the diamond jubilee of its founding. Canadians will enjoy that opportunity on July 1st next, and it is gratifying to note that the celebration will be well and wisely planned from coast to coast. Canadians, no doubt, would have with equal zest and enthusiasm celebrated the fiftieth anniversary of Confederation but for the fact that in 1917 they were engaged in a life and death struggle in which the very existence of Canada was at stake. The victory won through the great sacrifices then made should add to the gratitude and pride of our people in this year of the Diamond Jubilee.

Children today may have the opportunity of celebrating one hundred years of Confederation, but our adult population will not, and so those who actually witnessed the inauguration of this young nation, and those who have taken part in its earlier development, will no doubt throw themselves wholeheartedly into the ceremonies which will commemorate this historic event.

It is the repeatedly expressed desire of the National Committee created by Parliament to promote this Diamond Jubilee celebration that it should be participated in by all the people, old and young, in small hamlets and rural districts as well as in the larger centers of population. It is the spirit of the ceremonies rather than in their elaborate character that their real significance and value will be found.

The National Committee has, therefore, urged that there be at least one simple little ceremony everywhere at the same hour, and has suggested that, at twelve o'clock noon on July 1st in every community however small, bells should be rung, whistles blown, and the two national anthems "God Save the King" and "O Canada" sung. And again, that at 2:30 o'clock on the afternoon of Sunday, July 3rd, a community service of general Thanksgiving be held. For this latter service the National Committee is preparing a simple programme of exercises suitable for all communities.

These are suggestions which can readily be carried out in all communities, and it is to be hoped that the people of the Dominion will accept the lead of their National Committee and actively cooperate with it in giving effect to these suggestions. They need in no way interfere with the larger and more elaborate programmes being arranged in most cities, towns and villages.

It is further suggested that a tree be planted in every community with fitting ceremonies to be hereafter cared for and known as the Diamond Jubilee Confederation Tree. This, too, offers no obstacle on the score of expense to any community. Not only can such a tree be planted in some public place in all urban communities, but there would appear to be no reason why a Confederation Tree should not be given a place of honor in the grounds of every rural school throughout the length and breadth of the Dominion.

As a further marking of Canada's sixtieth birthday anniversary it is proposed that some public park or place in every community be named "Canada Place" or "Canada Square." If all such places already bear names, then, one the designation of which has no special significance, might be re-named in accordance with this suggestion.

Every child enrolled in a public, separate or private school in Canada in this Jubilee year is to receive a medal struck in the local mint at Ottawa, the gift of the National Committee. The presentation of these medals to the pupils offers a splendid opportunity to school district officials to plan a little ceremony at which a short talk on what Confederation has meant and has achieved for Canada could be given, and the boys and girls of today urged to render loyalty and devotion to Canada and dedicate their lives in service to their country.

Like most people living in northern climes, Canadians are not much given to showing their feelings. Their patriotism is something they do not talk about to any extent, and they are seemingly averse to display. But this Diamond Jubilee is one occasion on which the people of Canada may well wear a little, display their flag with profusion, shout and cheer. It will be a day of good, and especially should the children be encouraged to regard Dominion Day, 1927, as a red letter day in their young lives, and celebrate it accordingly.

A Country of Centenarians

Spain Has Large Number of Persons Over Hundred Years Old

Spain is the land of centenarians. The latest official census states that 251 persons (ninety-six men and 255 women) have reached the age 100; seventy-five men and 100 women more than 100 years old, and a number have reached 110 years.

There are 22,150 men and 26,291 women more than eighty years old. It will be seen that women are longer lived than men. Even Madrid, which has the reputation of being unhealthy, has twenty-four women and eleven men who are more than 100 years old.

Babies Cry For "Castoria"

Prepared Especially for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 30 years as a pleasant, harmless laxative for Castor Oil, Purgative, Teething Remedy, Stomach Syrup, Containing no narcotics. Proven directions are on each package. Physicians everywhere recommend it. The genuine bears signature of

Dr. H. Fletcher.

Fish By-Products

Map Showing Location of Plants in B.C. Has Been Issued

The Natural Resources Intelligence Service, in co-operation with the Department of Marine and Fisheries, has issued a map showing the location of all the Fish By-Product reduction plants now installed in British Columbia with the names of the operating firms.

The chief fishing areas are also clearly defined and it can be seen at a glance in which of these there are many, few or no reduction works, and where there appears to be room for further enterprise in this line.

At the present time there are 25 plants in operation, which produce oil, meal and fertilizer from salmon, halibut and other offal, pickled, herried, dogfish and whales. The Canadian National Railways are erecting oil tanks of 200,000 gallon capacity, and the National Pacific Railway is fitting a coast-wide steamer with a 170,000 gallon tank. There is a large demand for these fish by-products, which can be shipped direct from British Columbia ports to Europe and Asia.

Nine days constituted the reign of one English queen. She was Lady Jane Grey, granddaughter of Henry VIII, and was executed on a scaffold in the Tower of London in 1554.

The average man is about as awkward at bookmaking as he would be at cutting fresh bread.

A common Italian salutation in the morning is, "God give you a good day."

Minard's Liniment for Insect bites.

Wins Prize in England

Tobacco From Canadian Farms Awarded Medal for "Outstanding Excellence"

Canadian tobacco has been awarded a silver medal for the "outstanding excellence" of leaf tobacco shown at the International Tobacco exhibition held at Olympia, London, in May, according to an announcement made by the Department of Agriculture.

The Canadian exhibit was prepared by the Tobacco Division of the Central Experimental Farm, Ottawa, in competition with South Africa, Colombia, Italy, Greece and Macedonia. Canadian tobacco exports totaled in 1926 and the value of the leaf sent to Great Britain alone totaled over \$2,000,000.

2 Years' Backache

Subdued by "Nervine"

"Backache was the bane of my life, and for two years I was so lame as to be unable to do any work," writes E. S. Stowe, from Georgetown, White Horse, South Bros. Drug Store, 18 St. of Nervine being a wonderful pain destroyer. I doubt if there is another like this. Thanks to Nervine, my two years' backache was rubbed away, and today I am perfectly well."

All those who suffer from weak aching backs, those whose muscles are stiff, whose joints are swollen, let them try Nervine—the liniment that never fails. See at all dealers.

Agreement Has Expired

Railway Assisted Many Alberta Farmers to Move From Dry Area

Free movement of farmers and their effects from the drier areas in southeastern Alberta to new locations elsewhere in the province stopped at the end of May when the agreement between the government and the railways expired. During the past season to the end of April a total of 268 families with 955 cars of stock and effects have been removed under this arrangement. The majority of settlers, after changing their location, have gone to the farming country along the foothills from the Lethbridge district to as far north as Grande Prairie.

WOMEN WHO ARE WEAK

Gain New Vitality by Building Up the Blood

There are many women who pass their days in a constant state of weakness. They have barely sufficient energy to enable them to perform their manifold duties. Often they have an aching head, a miserable pain in the back, and limbs that feel as heavy as lead. The weakness is due to bloodlessness. No woman need suffer in this way. It is easy to obtain a supply of rich red blood by taking Dr. Williams' Pink Pills. The new blood created by these pills rapidly builds up the system; head-aches and backaches disappear, energy returns and the joy of living is felt once more.

Proof of these statements is given by Mrs. J. L. Lannon, Stony Point, Ont., who says: "For a long time I had been in a very miserable condition, always feeling tired out, sleepless and weak. The best work about the house would leave me hopelessly tired and nothing that I did seemed to relieve. Believing that a rest might do me good, we moved to town, but, contrary to expectations, instead of getting better I was growing steadily weaker. One day while talking to a neighbor, she urged my taking Dr. Williams' Pink Pills, telling me that her daughter had been in a condition much like mine. This persuaded me to try this medicine, and I have much to be grateful that I followed her advice. After the use of a few boxes of the pills, there could be no doubt that they were helping me, and as I continued their use my health and strength came back and now I am doing all my own work and feeling in the best of health. For this splendid condition I must give my thanks to Dr. Williams' Pink Pills."

"The pills are sold by all druggists, and you can get them by mail at 50c a box from Dr. Williams' Medicine Co., Brockville, Ont."

Origin of "Vaudeville"

Vaudeville originally meant a light, gay song, but it is now used as meaning a light kind of play introducing a number of songs. The word is derived from Vaude-Vire, the name of two valleys in Normandy, where, in the fifteenth century, a French poet composed songs that became popular and were called Vaude-Vire, after the valleys.

DODD'S KIDNEY PILLS

WORLD HAPPENINGS
BRIEFLY TOLD

Slavery has almost ceased in Burma, the Governor has notified the Viceroy of India.

The United States legation will establish offices in the Metropolitan Building in the heart of Ottawa.

Captain Montague White-Fraser, 73, veteran of the South African War, and former member of the R.N.W.M.F., is dead at Vancouver.

Finally revised statistics on the Canadian automobile industry show that the number of motor cars produced during 1926 was 294,727, an increase of 38 per cent.

Hon. Judge Jas. Flynn, former Premier of the Province of Quebec, and pulchre judge of the Court of King's Bench, of the Province of Quebec, is dead, after an illness of several weeks.

By September 1 the Independent Biscuit Co., Ltd., will have a factory in operation in Calgary, employing a hundred persons, it is announced. The company is capitalized at \$250,000 and will operate under a federal charter.

D. R. Poole, former secretary of the Manitoba Boys' Work board, has accepted the secretaryship of the National Boys' Work board, which represents the churches and the Y.M.C.A. in co-operative boys' work throughout Canada.

Dr. Abraham Zingher, noted bacteriologist, who helped perfect the Schick test for diphtheria, was hospitalized when he died in his laboratory at New York, while conducting research into the Dick test for scarlet fever.

Canada will be represented at Geneva on the question of naval disarmament by Hon. Ernest Lapointe, minister of justice, and W. A. Riddell. Mr. Lapointe is returning by way of the Suez route from Australia where he took part in the official opening of the new capital at Canberra.

The Department of Agriculture has removed the embargo on cattle entering Canada from England. The embargo was imposed on account of the foot and mouth disease. It was originally applicable to the whole of Great Britain, and was removed from Scottish cattle only about a month ago.

At the national Jersey cattle sale held at Tronton, N.J., a record price of \$3,600 was paid for a four-year-old Jersey cow from the stock farm of D. B. Bull and Son, Brampton, Ont. A three-year-old Jersey cow from the Brampton farm was sold to John Lee, of Ohio, for \$1,650. This was the second highest price paid in the sale.

Complete Restoration
of Rheims Cathedral

Historic Building Destroyed by German Fire is Again Open for Service

For thirteen long years the bells of the Cathedral of Rheims remained silent. Thirteen years have elapsed since the last service was held in the building which in the eyes of the whole civilized world, became the symbol of France's sufferings, trials, renaissance and regeneration.

Three dates stand out tragically marked in the cathedral's history. On September 4, 1914, the first German shell crashed through the north transept. On September 8, 1914, Mass was celebrated for the last time beneath the noble arches, under the shadows of which Joan of Arc five centuries ago had the Dauphin crowned King of France. On September 19, 1914, the cathedral was destroyed by the fire and the roof and bells crashed in, more than 400 tons of molten lead streaming down into the blazing furnace.

The long work of restoration is now terminated and the keys of the completed building have been handed over to Cardinal Luçon, Archbishop of Rheims.

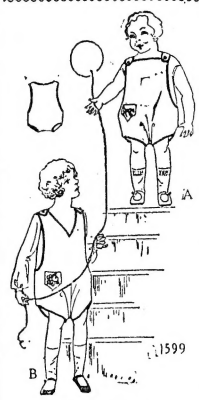

Plans for Russian Aviators

Five long flights are being planned for this year by the Society for the Development of Aviation and Chemical Industry in Russia. The first three will be within Russian territory, but a Soviet plane will attempt a flight to Stockholm, Copenhagen, Berlin, Paris, Prague, Vienna and back to Moscow. The fifth flight will be from Moscow to the Far East.

Australian wildernesses abound in subterranean rivers which may be tapped by artesian wells. Queensland now raises 600 million gallons per day. The artesian belt of Australia is larger than all Argentina.

The cry "Back to the farm" would mean more if raised by those who wish to go.

A New Coverall

Any boy or girl will find enjoyment in wearing the attractive one-piece coverall shown here. The back buttons open to the front at the shoulders and the neck may be either square or V-shaped. Contrasting material is used to bind the edges and the patch pocket is embroidered in an attractive design. No. 1229 is in sizes 7, 8 and 9. Size 2 requires 1 1/2 yards 27 or 32-inch material, and 3/4 yard 27-inch contrasting for binding. Price 20 cents the pattern.

The Transfer Design is No. 1168. Price 25 cents the pattern. Home sewing brings nice clothes within the reach of all, and to follow the mode is delightful when it can be done so easily and economically by following the styles pictured in our new Fashion Book. A chart accompanying each pattern shows the material as it appears when cut out. Every detail is explained so that the inexperienced sewer can make without difficulty an attractive dress. Price of the book 10 cents the copy.

Trucked Hogs Grade Well

With the extension of good highways from the marketing centres into the country the number of hogs delivered to the stockyards and packing houses by truck is constantly increasing. Not only is the delivery accomplished quickly, and therefore in good condition, but as was pointed out at a number of swine meetings in Eastern Ontario by Mr. Eric D. McGreer, the sheep and swine promoter of the Live Stock Branch at Kingston, it leads to rapid improvement in the grades because the farmer can see for himself the type of hog for which the highest price is paid. This explains why the percentage of sales in hogs trucked to market is usually higher than where they are shipped by rail.

Source of Chinese Munition Supply

Great Britain is Only Country Not Sharing in Business

Russia has hitherto been given the credit or discredit of being the chief source whence the warring Chinese factions have obtained their supplies of arms and other materials of war. Russians have been frequently reported to be serving in both the Northern and Southern armies, and the chief adviser of the Cantonese government during its drive to the Yangtze Valley was Michael Boroдин, the chief agent in China of the Soviet government, believed to be still in Hankow, the seat of that faction of the Cantonese most deeply imbued with the Communist ideas. Anxious to get fresh light on the origins of the Chinese arms supply, the contributor to the Nation and New Atlanticum, of London, England, who uses the pen-name of Kappa, conducted a private investigation of his own, uncovering a number of interesting facts. He found that while the Russians had contributed both armaments and men to both sides, some other nations had also been active in a similar way, notably Germany, that country sending to China during 1925 armaments to the value of nearly \$3,500,000. Some surprise would be natural at finding Norway in the trade to the extent of \$1,500,000, with Italy next, furnishing munitions worth \$1,000,000. United States manufacturers equipped the arsenal of the Cantonese, and France provided military airplanes. Great Britain, indeed, was conspicuous inasmuch as it was the only country that did not share in the business.

European residents in China who were compelled to fly before the advancing Cantonese probably did not realize that the Nationalist troops were armed with Western weapons. The situation, as the Brockville Recorder and Times sees it, recalls its kinship to that existing during the war when the Canadian troops became the target of shells into whose construction nickel mined in Canada entered. That Great Britain has refrained from assisting the arming of the Chinese redounds greatly to her credit. It is evident enough that uprisings and internal warfare will recur in China as long as traffic in arms is permitted to proceed without interference from the great powers. It can scarcely be satisfactory to the people of the United States to learn that the very arms used at Nanking, where one American, at least, lost his life, may have been supplied by a United States munitions firm. The practical solution of the difficulty apparently lies in reaching an agreement limiting the traffic in arms and signing and ratifying the Arms Traffic Convention to that end.—St. Thomas Times-Journal.

Issuing Jubilee Stamps

Postmaster-General Veniot is issuing a special series of postage stamps to commemorate the Diamond Jubilee of Confederation. They will be larger than the normal issue, and will depict the development of the Dominion, the expansion of its transportation systems and various phases of the nation's industries and resources. It is stated the stamps will bring joy not only to philatelists, but to the public generally.

Tom—"How can that little birthday gift for your wife be a surprise if she told you that she wanted it?"

Henry—"I'm not going to give it to her."

R. W. BALL

Formerly general superintendent in charge of eastern lines of the Canadian National Telegraphs, has been appointed general superintendent of western lines, with headquarters at Winnipeg. Mr. Ball will have jurisdiction over all territory west of Port Arthur to the Pacific Coast.

Employment at High Point

Returns Show That Employment is Now at Highest Peak Since 1920

Reports up to May 1 of this year from 5,948 firms showed that employment in Canada was at the highest point it has been since the Canadian Government Bureau of Statistics began to keep employment records in 1920.

The payrolls of the 5,948 firms reported on May 1, showed that there were \$30,850 persons employed. Manufacturing, construction and transportation recorded the most pronounced improvement, but large gains were also noted in trade, services and communication.

The official returns on employment in Canada do not include farmers. In the months of April and May there is always a considerable demand for farm labor to help in the seeding, particularly so in Western Canada, where millions of acres are sown to wheat and other grain crops.

Woman Radio Expert

Has Worked Up Well Paying Business in Brooklyn, N.Y.

Three years ago Miss Harriette P. Quick, of Brooklyn, N.Y., bought a radio set. It intrigued her. She took it apart to see what made it work, and finding that it was not nearly made, she rebuilt it to suit herself. Later Miss Quick showed the rebuilt set to some of her friends and they liked it so well they ordered sets like it. That started her in business and she set up a work bench and started filling orders. Today she does nothing else but build radio sets, except when she is creating aerials or trouble shooting. She is Brooklyn's only woman radio engineer and one of the few feminine radio experts in the world.

Origin of "Humbug"

"Humbug" originated when James H. of England coined base metal in his fight for the crown. The Irish called it Um Bog (worthless money), which became first Oombug and then Humbug.

How easy it is to tell others that it's no use to worry.

SUNDAY SCHOOL LESSON

JUNE 19

PETER TEACHES GOOD CITIZENSHIP

Golden Text: "Love worketh no ill to his neighbor."—Romans 13:10.
Lesson: 1 Peter 2:17; 4:15.
Devotional Reading: Psalm 146:5-10.

Explanations and Comments

1. The Seemly Life, 2:11, 12—"Beloved, I beseech you as sojourners and pilgrims"—thus Peter addresses his readers. Peter is here speaking metaphorically; he wishes them to realize that a journey, not a sojourn, and that the attainment of character which is eternal should be their aim; they were living, as it were, in exile on earth, heaven was their true home.

"The Christian looks for a life eternal. In comparison thereof the best things of this time are of little account. It is but as a lodging for a brief night, and at dawn the traveller sets forward for his true home."

Since they had but a short time to stay on earth, they must live their brief life nobly. "I beseech you to abstain from all fleshly lusts, which war against the soul," are Peter's words.

"Not let us so narrow its later pretensions that the majority of us escape the grip of the apostle's injunction. Let us attribute a comprehensive content to the unwelcome word 'lust.' 'Lust' includes the entire army of unclean forces which are antagonistic to the exalted realm of the spirit. It includes not only the carnal desire, but the jealous eye and the itching palm. Fleshly lust is everything in life which steams the windows of the spirit. Fleshly lust is therefore inclusive of envy, jealousy, avarice, insatiable selfishness, and insatiable ambition."—J. H. Jowett.

"Having your behavior seemly among the Gentiles; that, wherein they speak against you as evil-doers, they may be by your good works, which they behold, glorify God in the day of visitation." How like an echo from the Sermon on the Mount this seems: "Let your light shine before men; that they may see your good work, and glorify your Father who is in heaven." So Christ's pilgrim leaves a track of light behind him; he is a witness. The phrase "in the day of visitation" suggests a fear in the apostle's heart lest the response to this witness might not be immediate: it might have to abide Christ's own time. The hour of visitation which will also be the hour of illumination will come, and then all the guilt witness will tell—the holy walk, the patient endurance, the lofty testimony, the life that is fair to see.—J. M. E. Ross.

Per Capita Savings

People Now Seven Times Better Off Than in the Year 1900

Some interesting figures were recently made public regarding the per capita savings and per capita wealth of this country. The figures are worth quoting if only to disprove statements sometimes heard to the effect that we are worse off these times than in the good old days of a quarter of a century or more ago. In 1900 the per capita savings deposited in Canada amounted to \$32 and the per capita life insurance in force to \$70, giving a total for both of \$102. At the beginning of 1927, the per capita savings deposits amounted to \$152 and the life insurance in force to \$530, or a total for both of \$782, or over seven times the total of 1900. Figures of per capita national wealth, compiled by the League of Nations, are: United States, \$2,915; Great Britain, \$2,459; Canada, \$2,406; France, \$1,570; Germany, \$1,089; and Japan \$544.

Keep both eyes open on an enemy who wants to do you a favor.

Getting The
West's Money

High Pressure Salesman Selling Worthless Securities to the Unwary

The Saskatchewan Farmer calls attention to the "high-pressure salesman peddling highly speculative or worthless stock who are 'infesting' the Western Provinces." These men, it says, are conducting what has been termed one of the biggest promotion campaigns in the history of the West. Some of them are selling old stocks without any apparent value, and others are disposing of alleged gold-mining securities, while more or less uncertain industrial securities are also being offered.

It is the old story of inducing people to believe they can get rich quickly. It is being told in the East as well as the West, but perhaps the latter appears like a more remunerative field at present. The farmers are prosperous, and they may not have had the warnings which have been given from time to time in this part of the country.

Until some law can be found to protect the unwary investor he will continue to be prey for the promising salesman with a highly decorated piece of paper. If the victim is a man who can afford to take a chance, and who parts with his money knowing that he is merely gambling, the case is not so serious, but when a widow with a limited income is induced to buy worthless securities on the promise of better returns it becomes a matter for community interference. There should be a way to protect her, but the most effective means, so far, seems to be through publicity. Too many people do not realize that stocks and bonds paying substantial dividends do not go begging for buyers. When they are approached by salesman claiming to have such securities to offer they should consult a reputable broker or a banker before purchasing, and the chances are that they will be advised to keep their money.—Toronto Globe.

Government Annuity
Scheme Is Attractive

Labor Department Gratified by Responses From All Parts of Canada

The campaign of intensive and Dominion-wide publicity which is being consistently furthered by the minister of labor, Hon. Peter Heenan, has having a material result. This is apparent through the large volume of inquiries received by the Department of Labor, and the extent to which interest in Dominion Government annuities has been developed from coast to coast.

It might be expected that the more densely populated sections of the Dominion would show most interest in this form of savings or old age insurance. Responses, however, are coming from all parts of Canada. It is noticeable that the object most desired by the minister of labor, the development of thrift on the part of the workers and wage earners, is being attained, for it is from these classes noticeably that keenest interest is being displayed.

Officials of the department are reluctant to make any statement of comparative figures in respect to increased business undertaken, but they do not conceal the fact that very keen and very wide interest has been shown in the Canadian government annuity scheme.

Conference to be Held in Fall

Premiers of Provinces Will Go to Ottawa for Discussion

The conference of provincial premiers will be held in Ottawa in the latter part of October or early in November, it has been announced by Hon. Lucien Carron, solicitor-general, Hon. Fernand Rinfret, secretary of State, and the deputy ministers of the various federal departments.

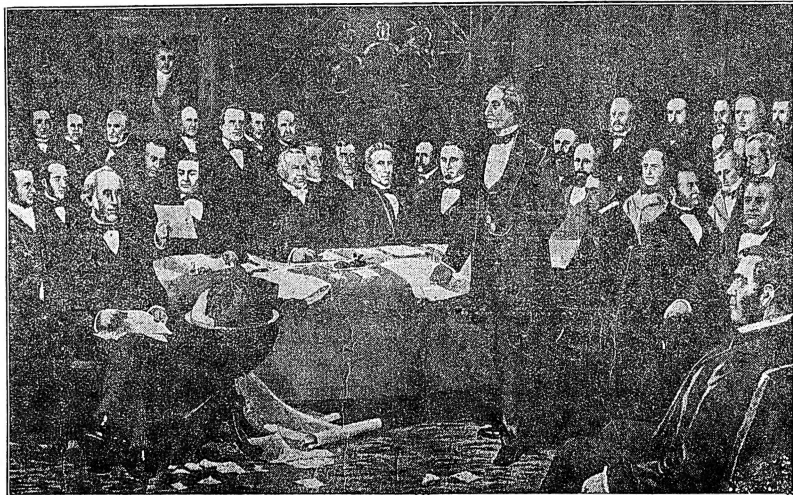

Selection of a definite date for the conference will not be made, it was stated, until the next meeting of the deputy heads with Mr. Carron and Mr. Rinfret.

In the interim, a list of subjects which the different departments desire to have placed on the agenda for discussion will be prepared. The provincial governments are also being requested to indicate the subjects which they wish to have discussed at the conference.

Manitoba Cordage Plant

The first shipment of wrapping cord from the Manitoba Cordage plant at Portage La Prairie moved over Canadian Pacific lines on May 10th, to the T. Eaton Co., Ltd., the Tribune Publishing Company and the Manitoba Cordage Company at Winnipeg.

A lower race never gets "intel" because it's too poor, but because it's bad mannered.

THE FATHERS OF CONFEDERATION

A rare print of the Confederation Conference held at Quebec, in October, 1864. It was presented to the Public Archives recently by the Right Hon. Sir Robert Borden.

CANADA IS IN SOUND POSITION SAYS HON. ROBB

Ottawa.—Is there any better risk than a Dominion of Canada bond, endorsed as it is by all the people of Canada, asked Hon. J. A. Robb, Minister of Finance, addressing the Investment Bankers' Association in convention here.

"Government is simply cooperation on a large scale, with the strength of the Government tested by the wealth and prosperity of its citizens," declared Mr. Robb. "To such tests Canada has repeatedly submitted itself during the past 25 years. Not only have Canadians stood the test; Canadian bondholders are respected everywhere, their word as good as their bond; Dominion bonds are now over par; the Canadian dollar is at par and better; Canadian credit at home and abroad was never better, while Canadian producers, raw materials, and manufacturers, are in steadily increasing proportion sold in the market places of the world."

Advocating the northward extension of Canadian frontiers, Mr. Robb declared: "Often I stand before the map of Canada and look at that narrow belt of civilization which stretches from coast to coast. It is not the length but the narrowness that is our problem. It is like an elastic belt—in stretching it we narrowed down the width—but having reached the geographical limits it is high time for us to broaden out and thus balance off our sectional divisions."

"The consolidation I do not mean the shifting of groups from one province to another, but rather the pushing of our frontiers into the North, bringing to the use of man more diversification in production, so that no section will have, as the saying goes, 'all its eggs in the one basket.' Success in this respect will develop interests in common and encourage willingness to come to reasonable and fair solutions of problems which from time to time arise. In this great work your activities are playing an important part."

Continuing, Mr. Robb stated that "we of the year 1927 do not own the natural resources of Canada. We are simply trustees for future generations, and indiscriminate slashing of trees or stripping of mineral veins, when these are yearly growing more valuable, may be bad investments from the national viewpoint."

"Projects touching the exploitation of our natural resources should not be considered simply as schemes which will produce immediate profits. It is not object to putting our natural resources to their full use, but submit that provision should be made for replacement wherever possible and that the practical need of Canada—not of other countries—at this moment should determine our policy."

Ontario Farmers Are Supporting Wheat Pool

Campaign Meeting With Success and Many Contracts Signed

Chatham.—The campaign for members to the Ontario Wheat Pool is meeting with success, in the neighborhood of 1,500 farmers of Kent County having already signed contracts, according to J. S. Jeffrey, manager of the grain department of the United Farmers' Co-operative Society.

"We have already approximately 7,000 farmers signed up in Essex, Kent, Lambton, Elgin, Middlesex, South Perth, Huron, Bruce and Simcoe Counties," he said.

Arrangements have been made with practically all the elevators in the country to handle pool wheat, according to Mr. Jeffrey.

Want Funds for Relief Work
Vancouver.—Relief of cases of distress among war veterans and their families is the purpose to which the organized ex-servicemen of the British Columbia with the \$250,000 campaign fund allocated for this province to support which a conference here of representatives of the Canadian Legion, the Army and Navy Veterans' Association adopted.

Amundsen Sails for Orient
Vancouver.—Captain Roald Amundsen, world renowned explorer and the only man in the world to have reached the two poles, is a passenger on the Empress of Asia, leaving on her 70th voyage west to the Orient. Captain Amundsen, who flew over the North Pole and also reached the Pole on his famous expedition, is looked for Yokohama.

Premier Brownlee Going to England

Will Inquire into Establishment of Agency in London

Edmonton, Alta.—Premier Brownlee expects to leave on a trip to England towards the end of this month. He has been considering the possibility of such a trip for some time past. It will be only in part a holiday event, however, for he has a programme of things that he proposes doing over there for and in behalf of the Province of Alberta.

A first hand check-up on the immigration work now being carried on by Hon. Herbert Greenfield and an inquiry into the possibilities of a general agency office in London will be one of the main purposes of the trip. The Premier will discuss the situation with various interested parties and organizations, and will see for himself what is the feeling in England towards closer relations with Alberta. In view of the improved position of the province he will also sound out the attitude of British industry and capital in the same direction, particularly in the hope of interesting further investment in the western Canadian field.

Another item on the premier's program will be an inquiry into the question of marketing Alberta products in England. In this respect he will be working in line with the Latchman Government, which has already sent a commission to the motherland to investigate the conditions and prospects of the livestock and bacon trade, while Manitoba also is considering a similar step. So far as Alberta is concerned the inquiry in addition will bear largely on wheat marketing, about which Mr. Brownlee will ask a lot of questions during the trip. The Premier is now making arrangements to get away and hopes to sail some time in the last week of June.

Abandons Quest in Arctic

Wilkins Believes Further Flights This Summer Would Be Foolhardy

Fairbanks, Alaska.—For this year at least Captain George H. Wilkins has abandoned his attempt to wrest from the uncharted Arctic the mystery of its "blind spot." With the coming of the fog which hung low over the Arctic Ocean in the summer, Captain Wilkins believes that further flights North of Alaska this summer would be foolhardy. Returning to Fairbanks from Point Barrow, the Northern base of the expedition, the Australian explorer and the other members of his party left for the United States.

The explorer has made three flights North of Alaska in an effort to prove or disprove the theory that there are islands between Point Barrow and the North Pole.

The second air voyage into the Arctic was made two months ago and nearly ended in disaster when the plane was forced down with engine trouble on the ice pack.

Wilkins and Ben Nelson, Alaskan pilot, walked 50 miles over the ice to land.

Starting from Point Barrow, Wilkins and Alger Graham, Detroit pilot, essayed the third flight June 4. They flew 200 miles toward Greenland but were forced by dense fogs to return.

Want Peace Treaty
Washington.—An informal inquiry as to the willingness of the Washington Government to begin negotiations for a treaty of perpetual peace between France and the United States has been passed forward from the Department by Foreign Minister Briand. The inquiry is in the hands of Secretary Kellogg, who is expected to answer it within a week.

New Pacific Cable
Victoria.—The freighter Dreditchy has commenced to unload 70 miles of cable which will form the last link in the new cable that connects up Canada with Australia and New Zealand. The line when completed will double the capacity of the cable business between the units of the British Empire.

A Long Auto Trip
Los Angeles, Calif.—A 6,700 mile trip in an automobile from the Pacific coast to New York city and back in seven days was completed here by Louis D. Miller, San Francisco business man, who claimed a new record for continuous motor travel and for elapsed time in the trans-continental tour.

Will Be Settled at Geneva
Belgrade.—It has been announced that Jugoslavia is willing to throw out the Albanian difficulty through the League of Nations and there is nothing to indicate undue excitement or a basis for rumors spread abroad of martial law in Belgrade.

Plan Confederation Memorial Campaign Shortly

Victoria Club Members Will Launch Campaign Shortly

Victoria, B.C.—Erection of a temporary memorial to commemorate the achievements of the fathers of confederation will be the contribution of the Victoria Kiwanis Club to the diamond jubilee of confederation celebration here next month. The Victoria club will shortly launch a campaign to have erected in the capital city in each Canadian province a permanent memorial to the Fathers of Confederation to be built by the province and the federal government.

Arrested on Serious Charge

D'Autremont Brothers Are Taken Into Custody in Ohio

Steubenville, Ohio.—Ray and Roy D'Autremont, wanted in Oregon for the killing of a postal clerk and three firemen in a passenger train held up four years ago, were arrested by federal agents and local police. The twin brothers, for whom a world-wide search has been conducted, were working in a steel mill here. Both admitted their identity when confronted by officers.

The brothers are accused of dynamiting a passenger train in a mail hold-up at Skidway, Oregon, in 1923.

WILL CONTINUE NEGOTIATIONS ON BORDER RULING

Washington.—Ample protection to all Canadians whatever their birthplace who have been in the habit of commuting across the international border to daily employment is asked of the United States in a note from the Canadian Government. The note is in reply to a recent note from the United States on border immigration regulations.

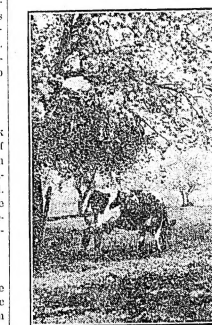

Hon. Vincent Massey, Canadian minister, delivered the note to Frank K. Kellogg, Secretary of State. Comment from the state department will be withheld until officials have considered the Canadian communication more fully.

The note approves the offer of Mr. Kellogg to continue negotiations on border immigration and expressed the hope that a satisfactory solution will be reached but regrets that the United States Government did not see its way clear to amend the border ruling on April 1, which went into effect June 1 and which gives non-active Canadians six months in which to secure entry as immigrants under the quota law.

It points out that there is no precedent for the application of the term "immigrant" to citizens legally domiciled in another country and retaining their citizenship in that country.

The Jay Treaty of 1793 is quoted to illustrate the broad principle of free border intercourse "to promote a disposition favorable to friendship and good neighborhood," and the note points out that the laws of Canada make no distinction between its citizens on the strength of birth place any more than do the laws of the United States distinguish between native and naturalized citizens.

Thousand Square Miles of Blossoms

Nova Scotia's festival time is fast approaching, when a thousand square miles of one of the world's finest growing valleys will be smothered in bloom. One of the significant days in this province is "Bloom Sunday," when people go by thousands to the Annapolis Valley to look upon the white and pink tabernacles of fragrant blossoms. The journey over the Dominion and Atlantic Railway at this time of year affords a trip long to be remembered, as the line passes through the very heart of the apple country. They cover more than 1,000 square miles of the province.

ASSASSINATION OF SOVIET ENVOY TO BE PROBED

Warsaw.—The Polish authorities have taken drastic steps to determine whether the assassination of Peter Volkoff, Soviet envoy at Warsaw, was part of a Russian Monarchist plot. Volkoff's assassin was a young Russian student studying at Vilna. The Polish police conducted searches and made arrests among the Monarchist colonies in both Warsaw and Vilna. Five arrests at the capital and 29 at Vilna.

The Russian newspaper Vlna-Nova Russia, which issued a special edition recommending subscriptions for the murderer, was promptly suppressed and the editor arrested.

The Polish Government is doing everything possible, it is announced, to fulfill the requirements of justice and has acceded to the Soviet demand for participation in the investigation, the Polish law permitting such a course.

M. Livinoff's sharp note has made a painful impression in Polish governmental circles, which deplore the tragedy and regard it as an internal Russian affair which accidentally happened in Poland, for which Poland has no moral responsibility. It is believed the Soviet Union will be satisfied with nothing less than the death penalty of the assassin, but it is not expected the tragedy will seriously impair relations between the two countries.

Socialist Mayor Ignored

No Invitation for Plymouth's Chief Magistrate When Prince Visits Town

London.—The Prince of Wales has arranged to make a tour of Cornwall and Devonshire for several days, and in connection therewith some recent merit is felt because those in charge of the Royal Western Yacht Club's proposed dance in Plymouth, Devonshire, have not invited Mayor J. J. Handley Moss, Plymouth's first Socialist chief magistrate, to the dance. The town clerk and other members of the Plymouth council have been invited.

"I am too big to mind, personally," Mayor Moss said, "but it is the town that matters. It is regrettable that any such spirit of snobishness should be allowed to creep in and injure a function like this."

Western Graduates

Toronto.—The Senate of the University of Toronto has announced the award of fellowships in the school of graduate studies for the session of 1927-28, including the following westerners: Mackenzie Fellowships—J. L. A. Pollard, Saskatchewan, department of history.

Special open fellowships—J. C. Casper, Alberta, department of classics; D. E. Culbert, British Columbia, department of English; L. S. Russell, Alberta, department of geology.

Sending Delegation to Germany

London.—The British Legion of the Empire Service League has decided to send a delegation to the international conference of ex-servicemen at Lausanne in July. German ex-servicemen will also attend.

Bay Ports Inquiry

Some Misapprehension Felt in West Over Investigation

Ottawa.—Carrying out the Hudson's Bay Railway project is being accomplished with some difficulty although it will be done. There is no doubt about that.

For years in the East, the scheme has been opposed, one leading paper referring to it persistently as a "fantastic mirage." Parliament, until this session, was either antagonistic or apathetic but Hon. C. A. Dunning then succeeded in getting through, with comparative ease, the appropriation that commits the Government to the completion of the line.

Now, when matters have been pretty well squared away in the East, criticism comes from parts of the West because the merits of Churchill as well as Nelson are to be looked into.

As has been pointed out, the decision to investigate Churchill did not portend its selection as the terminal. As a matter of fact, it is learned that the proposal of inquiring into Churchill came from the British expert, Frederick Palmer. He argued that to complete his report should cover both places and that in any event, his remuneration would be the same. That, really, is all there is to it. Heretofore Nelson alone has been considered. Now, Churchill also will be looked over and detailed data secured as to both locations. The wider inquiry, however, does not indicate the choice of Churchill but at the same time it will not exclude it as a possibility if it be found that its advantages exceed those of Port Nelson.

Appointed By Lincoln

Aged Resident of St. Cloud, Minn., Was Real Pioneer

St. Cloud, Minn.—Charles A. Gilman, 84 years old, former lieutenant-governor of Minnesota, and one of the few pioneers of the northwest, who received appointment to public office from Abraham Lincoln, died here recently from old age. Mr. Gilman, who had resided here for 72 years, was appointed receiver of the United States land office in 1861 by President Lincoln, and was re-appointed in 1865 by President Andrew Johnson. He served as lieutenant-governor from 1881 to 1885. Four daughters and a son survive.

Plea For Tolerance

Hon. Peter Heenan Criticizes Those Who Sow Seeds of Discord

Ottawa.—Hon. Peter Heenan, Minister of Finance, would have a message of tolerance and co-operation broadcast throughout the Dominions as Canada's jubilee celebration message, he told the members of a local service club.

He was severely critical of those who sowed seeds of discord and disunity in religious or social matters. Referring to the cry of Communists that labor was ill-treated in this country, the speaker said more had been done in behalf of the workers within the past ten years than in the previous half century.

NAME DELEGATES FOR BRITAIN TO NAVAL PARLEY

Washington.—Names of delegates who will represent Great Britain and her Dominions at the Geneva three-power naval limitations conference have been submitted to the state department by the British embassy and Canadian and Irish legations. Viscount Cecil, who for years has represented Great Britain in disarmament conferences in Europe, will head the delegation, assisted by W. C. Bridgeman, First Lord if the Admiralty, who will also represent India, and Vice-Admiral Sir S. L. Field, deputy chief of the naval staff.

Canada will be represented by Hon. Ernest Lapointe, the Minister of Justice. In the event that he fails to arrive in Geneva by June 20, the opening date of the conference, Canada will be represented by her permanent agent there, Dr. W. W. Riddell.

J. S. Smith, high commissioner for the Union of South Africa in London, and C. F. Pinner, trade commissioner for Europe will speak for the Union, while Sir J. Cook, High Commissioner in London, will represent Australia.

New Zealand will be represented by J. Parr, London High Commissioner, and Earl Jellicoe, Admiral of the Fleet, for the British Free State. Desmond Fitzgerald, Minister for External Affairs, and John Costello, Attorney-General, will be present.

ALBERTA COAL RATES TO EAST ARE ESTIMATED

Ottawa.—Three widely differing estimates of the cost of transporting Alberta coal to Ontario were before the Board of Railway Commissioners. The estimates were backed by imposing arrays of statistics and the testimony of three prominent rate experts.

E. P. Mallory, C.N.R. expert, represented the estimate prepared for the railway on the "out-of-pocket" cost of transporting coal from the Dominion to Ontario. His estimate was \$9.06 a ton. This estimate included \$1.37 of revenue which would be lost were American anthracite supplanted by the Alberta product.

George W. Oliver, Chicago, employed by the province of Ontario, presented an estimate of from \$5.55 to \$6.08 a ton between Drumheller and Toronto and an estimate of from \$5.03 to \$5.82 a ton from Edmonton to Toronto.

He was followed by S. W. J. Liddy, C.P.R. statistician, who estimated the cost at \$7.50 a ton from Lethbridge to Toronto and at \$8.31 a ton from Kansas Hill, Alta., to Toronto. The testimony further demonstrated that there would be no recession by either the C.N.R. or the province from the estimates presented. The testimony of Mr. Mallory clashed with that of Mr. Oliver particularly as to repair costs for cars used in transporting coal and the average load which such cars could carry.

The estimates of these witnesses covered the cost of a movement of 1,000,000 tons over the C.N.R. between the same points.

Mr. Mallory gave a careful survey of the method by which he reached his estimate.

He allowed, he said, for a 2.5 per cent increased cost due to rework or pending wage adjustments. Mr. Mallory estimated that with shipments of 1,000,000 tons of Alberta coal to Ontario the net operating revenue lost to the railway on shipments of United States coal which would be displaced would total \$1,385,050.

Including a profit on operating cost to provide all income changes and reserve, Mr. Mallory estimated that on the 1,000,000-ton shipment the additional cost to the railway would total \$10,797,751, if surplus or idle grain equipment were used. This would amount, including a fair profit, to \$10,602 a ton. Without the profit, the "out-of-pocket" cost of transporting Alberta coal would be \$8.96 a ton. Mr. Mallory's estimate of a fair profit was figured at a rate of 5 1/2 per cent, on a 70 per cent operating ratio, which resulted in a figure of \$2.18 per ton.

Bisley Team Has Sailed

Montreal.—The Canadian Bisley team sailed on the S.S. Annapolis from Montreal on June 16. The team will be in command of Brig-General J. Duff Stuart, of Vancouver, with Major Thomas McManus, Belleville, Ont., as adjutant. In addition to the regular team there will be present a team of cadets from the Hamilton Collegiate Institute, who are also going to Bisley to take part in the prize meet.

New Mining Company for B.C.

Vancouver.—With \$10,000,000 cash, C. C. Julian, noted California oil operator, formally entered into the British Columbia business and development field on a large scale. The formal part was completed at the Parliament buildings when Julian was granted incorporation papers under B.C. laws to operate in this province under the name of the New Monte Cristo Mining Co., with a capital of \$10,000,000.

Spent Weeks in Peruvian Wilds

Toronto.—After weeks of terror in the Peruvian wilderness, Robert Hirs, electrical engineer who was first reported missing and then dead in the wilds of interior South America, has returned safely to his home town, Toronto. Circumstances compelled him to live two weeks with a tribe of Iuca Indians in the jungle, a delay which occasioned alarm as to his safety.

May Have Crossed Ocean

Montreal.—A carrier plane with a ring attached to its leg with the inscription "Lille, France," was captured by J. B. Martin, a farmer of St. Constant, about 25 miles from Montreal. The bird was practically exhausted when caught and is now being taken care of by the farmer until it is claimed, if ever, by its owner.

To Attend Naval Conference

Washington.—Canada has notified the United States Government that the Dominion will be represented at the naval limitations conference at Geneva.

Hides and Leather Industry

Analysis of the Leather Industries Shows Few Animals Killed for Hide Alone

That the domestic supply of skins suitable for tanning might be increased in a small way by utilizing caribou hides, the goat skins, seal and shark skins of British Columbia, the walrus hides and white whale skins of the Arctic and the half-skin hides which are now shipped raw to Liverpool, is among the many interesting statements in a report recently issued by the Natural Resources Intelligence Service of the Department of the Interior at Ottawa, as the result of an investigation of the hides and leather industry. The 60,000 elk hides, 500 moose and 9,000 deer, all "canned" tanned in Quebec, are at present the only hides of wild origin that appear in the official returns of the leather industry. Since very few wild animals except the caribou, the shark and perhaps the walrus, are killed for their hides alone, the supply of hides and skins is regulated not so much by the demand for leather, but by the consumption of beef, veal, mutton, lamb, and dairy products and in a measure by the use of draft animals. The hide market is international because of the universal breeding of animals for meat, wool and dairy products, and for tanning purposes, and because of the universal demand for leather.

Part of this investigation is given to a satisfactory explanation of the paradox that though Canadians export leather to the value of seven millions, they yet import no less than nine millions. In answer to another question, whether supplies of hides are limited, it is shown that Canada's domestic production of hides supplemented by raw material brought in from open markets of the world is ample for the leathers on which the industry is mainly based, but that for the many lighter purposes for which real leather is not essential, artificial leather is produced on a large scale to meet the demand. For these purposes it is a cheap and effective substitute which makes little or no inroad on the real leather industry.

The use of elaborate machinery has now largely replaced the bulk of old time hand work in the tanning industry, which also by the progress of knowledge in the last 50 years has been raised from its empirical status of several thousand years to one of scientific complexity. While the number of tanneries in Canada has actually decreased in number during the past seventy years, the importance of the industry has as a whole steadily gone forward. The capital invested at the present time in this industry is over 30 million dollars.

Commenting on the possibility of extending the market for Canadian leathers, the report draws attention to the fact that the Canadian industry is based at present as in the past on the heavier leathers. Heavy hides obtainable to a certain extent in western Canada, weighing from 50 to 70 lbs. are used mainly for soles and belting but, owing to improved devices for splitting, the heavy cow hides are now often used in the place of calf for uppers. Whether in face of the severe competition and the inroads of artificial leather it would be profitable to install expensive equipment with a view to covering the Canadian market for light and fancy leathers is a matter for only the most thoughtful consideration. If there were a large enough supply of Canadian hides of the variety needed of the right average weights, branded to avoid waste, free of grubs and properly salted, and available at economical freight rates, there would be much less reason for exports and the amount of imports would be largely reduced. But all these conditions are not met in Canada where cattle ranges are not increasing and where a sheep number less than two million.

Take Canadian Graduates

There are 21,101 living graduates of eight representative Canadian universities. Of these 4,122 live in the United States—more than 20 per cent. of the total number. Uncle Sam has cause to regard Canada with complacency as a breeding ground for intellectual culture that costs him nothing.

A woman got on the trolley car and finding that she had no change handed the conductor a \$10 bill.

"I'm sorry," she said, "but I haven't a nickel."

"Don't worry lady, said the conductor, you'll have just 150 of 'em in a minute."

"For heaven's sake, dearie, turn the radio!"

"That's not the radio—that's the vacuum cleaner."

W. N. U. 1585

Predicts Big Discoveries

University Head Says Science on Verge of Amazing Finds

The world is on the threshold of amazing discoveries, not alone in the field of natural sciences, but social sciences as well. Dr. Max Mason, president of the University of Chicago, told the American Society for Steel Treating at Milwaukee.

"In the field of physics, scientists are on the verge of working out a super-Newton equation to define laws of motion for electrified particles which are units of matter," he declared. "This equation will explain the correlation which exists between actions in one place and actions in another."

"Jiggle an atom here and every other atom in the universe, somehow, sometime, jiggles in response. Call it radiation—call it what you will. Stab your toe here on earth and Mars feels it, and later on the earth responds to the reaction of Mars."

Great Chinese Wall Is Well Preserved

In Almost Perfect Condition After Two Thousand Years

Few people realize what an almost perfect condition prevails along a large part of the great wall of China. The bricks of the parapet are as firm as ever, and their edges have stood the severe climate of North China with scarcely a break. The paving along the top of the wall is so smooth that one may ride over it with a bicycle, and the great granite blocks with which it is faced are smooth and as closely fitted as when put in place over 2,000 years ago. The entire length of this wall is 1,100 miles. It is twenty-two feet high, and twenty feet in thickness. At intervals of one hundred yards or so there are towers some forty feet in height.

Movies and Juvenile Delinquency

Montreal Judges Would Bar Children Under Sixteen Years From Moving Pictures

One of the greatest causes of juvenile delinquency is the motion picture and children under sixteen years of age should not be allowed to attend under any circumstances, Judge Laroche of the Montreal juvenile court stated before the Royal Commission investigating the Lauder Palace Theatre disaster, which cost the lives of 73 children on January 9 last.

As a result of watching lurid tales of robbery and crime small boys went out and emulated the doing of their favorite movie villain, while the girls acquired extravagant tastes by setting up the elaborate toilettes of the heroines as the standard.

Becoming Important Industry

Canadian Grown Vegetable Seeds Are Supplanting Imported Stocks

Seed production in Canada is steadily becoming an important and profitable industry. The kinds of seeds of which an exportable surplus is being produced, and for which the demand is increasing, include wheat, oats, barley, peas, alfalfa, red clover, alfalfa, sweet clover, blue grass, bromegrass, brome grass, and Rhode Island bent grass and flax. The production of other kinds, particularly vegetable seeds, is also increasing and these seeds are proving their excellence by supplanting imported stocks on Canada's home markets.

Voters Lists by Aeroplane

Air Route Aids Election Work of Inland Manitoba

For the first time in the history of Manitoba election registration lists have been transported by aeroplane to outlying points in the province. The lists were for several mining areas in the Ruperts Land constituency and were carried from Long Lake to Lac du Bonnet by one of the planes operating into the Northford from Winnipeg. It required about 45 minutes to make the trip compared with several days by the usual overland route.

Amateur Heard in England

Woodstock, Ontario, Men Broadcasts Message on House Made Set

Travelling more than 4,000 miles of ether, C.N.V. a home-made radio transmitting station, built and operated in this city by Charles Shelden, Jr., has been heard in England. A card was received by Mr. Shelden advising him that his message on May 13 had been received and read clearly by F. N. Baskerville, a radio enthusiast of 9 Arthur Drive, Altrincham, Shropshire, England.

Warned-over love is anything but satisfactory.

It's easier for a woman to hold a strong man than her own tongue.

Canadians Great Egg Eaters

Average for Each Person About 25 Dozen Annually

Canada's Live Stock Commissioner is engaged in a lively campaign to increase the home market for eggs. The fact, however, appears to be already well accepted and, therefore, not so pressing as it otherwise would have been. For from Mr. Motherwell, the Dominion Minister of Agriculture, took occasion to point out the other day that Canadians are not only among the most successful breeders of first-class poultry, but are inconspicuously the greatest egg eaters in the world. Canadians themselves consume ninety-nine per cent. of all the eggs produced in their own country, exporting only one per cent, that small portion, however, accounting for an amount running well into thousands of dollars annually.

As a matter of fact, Mr. Motherwell again tells us, each Canadian now eats less than 25 dozen eggs annually, a sharp rise from the per capita consumption of only 16 dozen that prevailed before the grading regulations were adopted. Canadians are thus the greatest individual consumers of eggs of any country in the world. That is an achievement which speaks well for the policy of the Department of Agriculture in regard to the grading of farm products for improving the general health of the nation. Eggs, it is generally agreed, constitute a very important source of nourishment and strength, and as long as each Canadian continues to eat no fewer than 256 eggs annually—think of it! 256 eggs boiled, fried, scrambled, poached, omelette, or however you will—almost one egg a day for every day in the year—there need be no fear for the future vitality and sturdiness of the Canadian people, and no fear for the future of the Canadian poultry industry.

Would Earn His Rest

Travellers in Ceylon Have Soreness Time According to Story

Low Leslie, the British theatrical producer, tells a yarn regarding travellers' accommodations.

It was a tale about Ceylon. A stranger had just arrived at a Colombo hotel, and the chambermaid said to him, as she put his bedroom in order:

"Have you asked at the office for the frog to kill your cockroaches, sir?"

"The frog to kill your cockroaches, sir. Make them give you a young man, muscular frog, a good jumper; one that will clear out the cockroaches thoroughly. Then, afterwards, when the cockroaches are all gone, you must go down to the office again and get your snake."

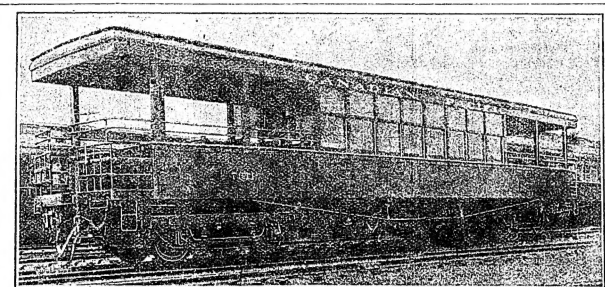

"Snake? Good heavens! Why a snake?"

"A snake to eat the frog, sir," replied the maid. "And then, as soon as the frog is eaten, you must get out of bed and kill the snake with a club. After that you'll be sure of a good night's rest."

Why Trees Grow Straight

When Close Together Each Pushes Upward Toward the Light

Though fir and hares grow "naturally" straight, this peculiarity in certain classes of timber is said to be the result of the trees growing together in close company, by which means they are also enabled to attain great height. Where trees are closely populated, each individual tree, to avoid being stunted must always be pushing upwards towards the daylight. Thus it is that with keen competition for a place in the light the trees take a direct line for this position, and the race being fast and furious they attain a remarkable height.

C.P.R. Observation Car Combines New Features

A departure in the usual type of observation car used by the Canadian Pacific Railway Company throughout the Canadian Rockies has been made. The above photograph shows the new car which will replace the open-top car used formerly on mountain journeys.

In designing the new type of the protection of passengers was the

The Cause of Crime

Desire for Material Gain Without the Desire to Work for It

One does not, as a rule, look in annual Government reports, especially to find there a homily on moral and social conditions. And yet it is something like this which is contained in a few sentences in the fifty-eighth annual report of the Inspector of Prisons and Public Charities upon the prisons and reformatories of the Province of Ontario, which has just been issued. In his introduction to his report Deputy Provincial Secretary H. M. Robbins calls attention to the fact of the increase in crime and that the City of Toronto sent to prison 40 per cent. of the total number committed to jail in 1925. He then says:

It is apparent from the foregoing recital that, whatever else may be stationary or decreasing, crime is a progressive factor in our national life. It has come uninvited, and remains unwelcome. Within a generation it has wrought many changes in all departments—in business, in education, in the Church, in the courts, in society and in family life; and if we diligently seek for its cause we will probably find it in a desire for material gain without the desire to honestly work for it. Material development has outstripped the development of moral or spiritual growth.

In the last sentence of the statement quoted Mr. Robbins places his finger on the root-cause of the present crime condition so prevalent and so much lamented on this continent. It is in the realm of the moral and the spiritual that any real efforts at reform must begin if they are to be efficacious, and such efforts should begin early. The best offset to materialism and the reduction of crime could be discovered in their formation of old-fashioned home training, and the inculcation in the hearts of the young of the divine principle that "a man's life consisteth not in the abundance of things that he possesseth."

Was Especially Long Lived

Carp Caught in 14th Century Said to Be 267 Years Old

Certain animals, birds, and reptiles are very long-lived, though nothing can be discovered in their formation to account for the circumstance. The elephant, the eagle, the crow, the parrot, and the viper are especially remarkable for the length of their life. In 1597 a carp of prodigious size was caught in a fish-pond in Suabia, with a ring of copper round it, on which were engraved these words in Latin: "I am the first fish that was put into this pond by the hands of Frederick II, Governor of the world, 5th October, 1250." It must, therefore, have lived at least 267 years. But these facts have been seriously doubted of late, though it is certain that carp have very long lives.

Lost Property Clerk: Your wife has lost her purse in this building?

Husband: Yes, a brown one, with flaps.

Lost Property Clerk: And your wife's name, sir?

Husband: Helen Summer, (with feeling) it's the same in winter.

"Oh, Mrs. Summer, your husband told that there wasn't another wife like you in the wide wide world."

"Did he really, Ghysels?"

"Yes, and he said it was a good job, too!"

"We must cleanly and carefully wash our customers with cheap prices as under—Ladies \$2 a hundred; Gentlemen, \$1.75 a hundred." — Laundry sign quoted in "Chinese Fantasies."

Treatment of the Nursing Sow

Ground Oats, Bran, Shorts and Middlings is a Good Ration

The first feed of a nursing sow should be a warm soup of middlings. During the first ten days gradually increase the ration to the maximum, feeding that from the very start the little pigs have exercise. Ground oats of good quality, bran, shorts and middlings, equal parts, is a good ration, and may be fed diluted with milk products, such as equal parts of skim milk and water. So advises Mr. G. D. Rothwell, the Dominion Animal Husbandman in pamphlet No. 74 of the Dominion Department of Agriculture dealing with breeding and feeding the Market Hog. "Mr. Rothwell doubts the advisability of the unlimited use of dairy products with the brood sow in good condition, many pouring liters resulting from overfeeding from a deep-milking sow. See that the sow gets exercise as that means more perfect scavenging and more natural functioning of her excretory organs. In the spring, and in the winter, a few roots, some clover hay and bran will help to keep the blood cool. Mr. Rothwell further advises the emptying of a pailful of earth and wood ashes in a corner of the pen every few days, and nothing so soon the little pigs gravitate toward this corner. Exercise of both dam and litter is an absolute necessity."

Wild Horses of Western Plains

Are Descendants of Imported Stocks Brought Over From Europe

Thousands of "wild" horses are being rounded up on western ranges, across the line, killed and sold to rendering companies. The horses are worth more in by-products than as beasts of burden.

But according to Dr. James W. Gidley, assistant curator of vertebrate paleontology of the United States field museum, these horses are not wild, but are merely domesticated animals enjoying freedom. Every horse in America today, he says, is a descendant of imported stock brought over from Europe or Asia.

But thousands of years ago, even before the first Indian appeared on the continent, there were real wild horses differing far more in size and general formation than any species of animals today. All of these, says Dr. Gidley, were killed off in some strange way unknown to science. He has found many fossils of the real native horses and says all of them were extinct before the human era.

Bars German Language

Use is Strictly Forbidden in Polish Upper Silesia

Not even clowns are allowed to use the German language in Polish Upper Silesia.

When a circus which had been anxiously awaited by the population, arrived at Katowitz, the director got an unpleasant surprise. The police insisted that he sign a guarantee not to permit one word of German to be spoken during the performance, so the clowns, who were the greatest attraction had to use Polish, French, English and Italian.

The majority of the city's population are German, but they remained away and so the show suffered a severe curtailment in revenue.

Reindeer Farms a Failure

Experimental introduction of reindeer to Baffin Island has proved a failure, according to advice received by the Department of Interior from the Hudson's Bay Reindeer Company, Ltd.

Those who assume the most often know the least.

Argument Cannot Be Denied

People Have Right to Say They Belong to Canadian Race

The Manitoba Free Press, which has been persistent in the demand that the word "Canadian," as typifying people identified with the country through long years, should be officially recognized, puts the matter very concisely when it says that when one comes around and asks a Canadian whose ancestors have been in Canada for 100 or 200 years to what race he belongs, the individual should have the right to say that he belongs to the Canadian race. If the authorities at Ottawa wish to figure out just what racial strains may mingle in the individual they can get as much information as possible along these lines and then figure out the proportion for themselves. This is an argument which cannot be denied.

In England there are people whose original stock came over from Holland with William of Orange, such as the Bentleys and the Kerpels, represented today by the Duke of Portland and the Earl of Albemarle. They are English and so rightly regard themselves, but were the system of the Canadian census in vogue in Great Britain, they would be put down as Dutch.

Another case of the ridiculous, is, again, the census system as used in Canada where people of the Royal Family they would not be English but would have to go down as German. Another case of the ridiculous. There can be no doubt that the word "Canadian" has to be recognized as identified with Canada. There is such a thing as Canadian stock. To fail to recognize this in the tracing of ancestry is a process of splitting hairs, and when it comes to tracing ancestry how many will be able to do this unless they carry genealogical trees about with them?

We have a people of mixed origin in Canada, just as there were in Great Britain with Jutes, Angles, Britons, Normans, French, etc. There is no reason why a people of mixed origin who do not belong to any particular race through inter-marriage should not be identified with the new land in which they were born and where their ancestors lived for a long period. This is only the argument of common sense, which should be applied to the way in which the census enumeration is conducted. The sooner this is recognized the better, or else there will be no meaning to Canada—Lethbridge Herald.

Built First Steamboat

Inventor Has Been Recognized After Century and a Quarter

One hundred and twenty-nine years after his death by his own hand, the U.S. federal and state governments formally honor John Fitch, inventor of the steamboat.

Governor W. J. Fields, in an address at the unveiling of a monument at Hardston, Kentucky, erected by the war department, said that with the recognition accorded the inventor, one thing remained to be done.

"That is," he said, "to see that history is corrected and the textbooks be made to teach that Fitch, rather than Fulton, be credited with his wonderful invention, which has done more than any other to move civilization forward and bring all parts of the globe into actual personal, financial and commercial contact."

The governor recited that in the records of congress were a letter from Robert Fulton himself recognizing Fitch as the inventor of the steamboat, and other data which were used to establish the claim of Fitch. Fitch, a native of East Windsor, Conn., went to Hardston as a boy. He worked there until he joined the revolutionary forces at Valley Forge. After the war, his third attempt to build a steamship was a success, and on August 22, 1787, a vessel 45 feet long, 12 feet wide, and containing an engine with a 12-inch cylinder moved up the Delaware river under its own power.

Young Husband: It seems to me, dear, there's something wrong with this cake.

Young Wife (triumphantly): That shows how much you know about cake. The cook book says it's perfectly delicious.—Ideas.

"What did father say when you told him you were going to take no away from him?"

"At first, he seemed to feel his loss keenly, but I squared things with a good cigar."

"Do you believe in the survival of the fittest?"

"I don't believe in the survival of anybody. I am an undertaker."

CHAPTER I.—Continued

"Are they all bad, Aunt Lili?" asked Helmi, fearfully.

A long spell of coughing delayed the answer.

"They don't want to settle down in their home like we do; they don't like kids and a nice quiet life—though they will tell you that. You are pretty Helmi; that's why I am afraid. I don't want Mike to see you if it can be helped. He'll want you just like he wanted me. Kate, the cook, will keep you safe. All the girls are my friends. . . . Remember what Aunt Lili said, Helmi."

Having received the extension of time she had asked for, and having delivered her message, Aunt Lili gave up the fight without a struggle. The silence of the room was broken by the stirring sobs of the girls, the cook, and the two upstairs girls. She had said goodbye to all the girls in the house the night before. Her last and tenderest words were for her young niece.

"If you could only tell English I would say," she had said. "It is a good country, but it's too hard for a pretty girl who has no English. I can learn, dear Auntie," said Helmi, kissing the thin white hand, "like you did, Aunt Lili," but Aunt Lili did not hear.

Mike Laine, the proprietor of the "Farmer's Home," learned in some way of his niece's arrival and asked to see her. He pinched her arm affectionately the day of the funeral and told her to call him "Mike," and cut the "Uncle" stuff. His burning eyes made her shudder.

One of the girls talked Finnish, and in big Kate's room off the kitchen, a council was held. Helmi was firm in her determination to stay. Big Kate, who had one hundred dollars in trust for her, urged her to go home; and the Finnish girl faithfully interpreted both sides of the argument.

For three days the discussion raged. Helmi during the intervals having washed her clothes and learned their English names. She also did her share of dishwashing and potato peeling. Her skill in these matters won the heart of the cook, who on the third day wrote a letter to her sister in Winnipeg (telling her to meet the train from Saint Paul on a certain day and look out for a "Finnish" girl with red hair and a green 'Tam o'shanter).

The day that Helmi left, Big Kate made the explanation to the bereaved uncle. Being the cook, she was not afraid to talk back to any one; besides, she had certain information which quelled Mr. Laine's outburst of

OPERATION LEFT HER VERY WEAK

Letter Tells of Wonderful Relief After Taking Lydia E. Pinkham's Vegetable Compound

Coniston, Ontario.—"After a severe operation and a three weeks' stay in a hospital

I returned home so weak that I was unable to move a chair. For four months I was almost frantic with pain and suffering until I thought there could be any help for me. I had very severe pains in my left side and suffered agony every month. One day when I was not able to get up my mother begged me to try your medicine. My husband got me a bottle of Vegetable Compound at once and I took it. I started to feel better, and to my surprise and joy the pains in my side left me completely and I am able to do all my work without help. I am a farmer's wife, so you see I can't be idle long. In all, I have taken six bottles of Lydia E. Pinkham's Vegetable Compound, five boxes of the Compound Tablets, two boxes of Lydia E. Pinkham's Blood Medicine, and have also used the Sanative Wash. . . . Mrs. L. LAURENSEN, Box 103, Coniston, Ontario.

W. N. U. 1685

Indignation. Miss Katherine Kenny was not so large that she could not kneel at the door and apply her eye to a keyhole in such a manner that the whole room and its activities were revealed. Mr. Laine could not reply to Miss Kenny's accusations and threats of exposure by hitting her over the head with a chair. Such crude methods of dealing with women can only be safely used inside the hallowed precincts of matrimony. He contented himself by telling the cook he didn't care what she had done with the girl; he had "had enough of these bad tempered Finns, anyway."

With this Mr. Laine shrugged his shoulders and went back to the bar. He would probably get the girl yet. She would be writing back for money and chaining relationship with him. A girl like that, right off the farm in Finland, with a pretty face and no English—Some fellow would be too smart for her.

On the Soo line, in the day coach, with her face against the glass, a box of sandwiches beside her, money in her purse and five ten-dollar bills sewed securely into the pocket of her petticoat, sat Helmi, watching the landscape slip past. It was a brilliant day in March; wild geese were flying north in V-shaped formation; cattle with bleating cries were roaming the fields; black channels of water licked their way through snow; snowdrops were showing like rows of fancy stitching under the fields. At one station, where the train waited to change engines, the boys and girls just out of school had come down to the station. Helmi was glad to see one girl wearing a cap much like her own—it gave her a delicious thrill of

month. A boy and girl walked away together, the boy carrying his companion's books and skates as well as his own. He leaned towards her as he spoke.

Helmi's eyes were wistful as she watched. "They are not all bad," she said in her own tongue.

The train here settled on. Big Kate Helmi watched the racing, swinging, sliding fields. The sun went down in a crimson haze, shooting streamers into the sky, so warm and glowing that it seemed to Helmi like a welcoming fire, where she would find friends, home and happiness. Even after the sunset had faded and faded into the gray of night, she knew that it was still burning and glowing and beckoning her further on.

And so came Helmi, young, strong and unafraid.

CHAPTER II.

Margaret Kenny was wiping her hands on the bran-colored roller towel which hung behind the pantry door, preparatory to the opening of her sister's letter, which lay on the drain board. Not for a moment did the older Miss Kenny take her eyes off the letter.

"It's from Kate in the States," she said, "and so it's trouble. She's adopted a child, or killed a man for beating his horse, or something. She never writes only when she is in South of some kind. Gosh! I often wish, she was in jail, where I'd be shut of her, bad cess to her impudence. I told her the time she sent me the dog that I was done with her. Well, I may as well open it."

As Miss Kenny read the letter, following each line with a red forefinger, conservatism settled upon her like a tent.

"What the devil!" she began, "Finn girl, red haired and smart—'s had to get her away. It was not safe for her here. . . . I remain your loving sister, Kate."

"Oh! So she remains my loving sister! Well, I am no loving sister of hers. She always finds the trouble—she can place it without a willow wand, can Kate;—and then hands it on to me. Well, here's a pretty how-do-you-do, a Finn girl, no English, comin' on the train. 'Please Maggie, find her a place. Easiest thing in the world, Maggie sorra a thing you have to do; anyway' . . ."

"See here, Anna Milder, you should be the one to look out for a Finn girl. Listen to this."

The head dining-room girl came

laughingly into the kitchen. "What's the row?" she asked. Maggie read the letter. "She'll come in at five tomorrow, just when I'm up to my eyes in the dinner. Now, you go down—you can speak to her and be back in time to carry the dinner, too."

Anna's head was bang back. "I think I see myself—I didn't send for this girl—she's nothing to me—merely another wage slave coming to take a job. There's too many girls now for the jobs."

Maggie Kenny's face was screwed up in astonishment. "My God," she cried, "is that the brotherhood you learn at your meeting?"

"We're opposed to immigration," said Anna firmly. "The Government dumps in people here, just to keep wages down. It's the capitalists again. You haven't sense enough to see it."

"For all the brains, selfish lungs I ever saw it's your Anna. When you came here two years ago all you could say was 'Viss.' Why showed you how to make a bed and comb your hair and garnet up your stockings. And now, by Gosh, you wouldn't meet another girl at the station, and her from your own country and all. Did you never hear of the Golden Rule. So as you would be done by?"

"Oh, snuff, Maggie," scoffed Anna. "No one believes that now. The idle rich sling that stuff around to lull us to sleep, that's all. It may catch you and your breed, but not us. We've gone a long way past that."

"What the devil do you want, Anna Milder. Haven't you a good job, good meals, good bed, better clothes than you ever had?—What else you?" "You have nothing to lose but our chains," said Anna loftily. "How long could old Spencer run this joint without us? The work belongs to the workers, but we haven't the backbone to claim it. Softies like you keep us back with your Golden Rule, and the Spencers get the profits. There's only two classes, those who work and those who live on other's work. Some people earn and some spend. If the workers would all organize we could dictate terms. Some day we'll do it. Then a new day will come."

(To Be Continued.)

Claims Oldest Sewing Machine

Cranbrook Woman Using One Twenty-three Years Old

A seventy-year-old automobile may be considered old, but there are sewing machines in use in British Columbia cities that came to this part of Canada many years before the railroads traversed the Rockies.

All through the province, especially in the interior centres, there are sewing machines that were brought to the coast on sailing ships around Cape Horn.

A short time ago, a continent-wide search was made for the oldest sewing machine in the United States and Canada. Letters were received from 152,940 owners entering machines in the contest. More than 100,000 of these machines were at least 40 years old, but the winning machines were manufactured before the beginning of the American civil war or Canadian Confederation.

The oldest sewing machine in Canada is said to be the property of Mrs. P. W. Mills, of Cranbrook, B. C. It is 72 years old, and yet it is still in regular service, and as sound as when it was first used.

Many people are almost crippled with rheumatism. But it is useless suffering which can be speedily ended with Follin's Corn Remover.

Linoleum for Scarlet Fever
Inoline, injected hypodermically, not only will cure scarlet fever, but will totally kill its germs, according to a doctor practicing in the Ambruzzi Mountains in Italy. He said he tried it during a recent epidemic and stamped out the scourge in a few days. The linoleum was injected in quantities proportionate with the age of the patient.

Diarrhoea Summer Complaint HE ALWAYS USES

Dr. F. F. McGregor, McLennan, Alta., writes:—"Over forty years ago my mother used to give me Dr. Fowler's Extract of Wild Strawberry for diarrhoea and summer complaint. All through the years since then when troubled with an excessive looseness of the bowels I have been accustomed to take a few doses of the same old, reliable remedy and it always seems to have the desired effect, no matter what the cause."

Don't Accept a Substitute
This valuable preparation has been on the market for the past 80 years; put up only by The T. Millum Co., Limited, Toronto, Ont.

"The wonder metal of the age" is a fitting term for Aluminum. Its lightness, brightness, flexibility, freedom from rust, and many other good qualities, make it adaptable to a multitude of uses, a chief one being as a container par excellence for good tea—Red Rose Tea is packed only in this modern metal package.

Trade Routes Encircle Globe

Ocean Has Been Mapped to its Farthest Recesses

North, south, east and west, crossing and recrossing, threading their way to the great and thrilling commercial ports and to the far-distant, seldom-visited trade outposts situated on some tropical island or the banks of a vast and mysterious jungle river; bearing on their broad surfaces the keels of myriad ships, stretch the sea-lanes of the world. There are many of them, some fabled up with pride at the importance of the ships and cargoes that travel their way; others are steady-going, industrious routes that rest well content in the knowledge of their worth to the traders with far places; and other sea-lanes which lead to some almost forgotten outpost of commerce of empire, are neglected and lonely. Secure two or three ships pass silently over their waters during the course of a year. Whichever a ship sets sail and leaves harbor mouth, she enters upon one of the sea lanes, for the routes of ocean trade have become in the main, so well-travelled that the once "unexplored" ocean is now explored and mapped to its farthest recesses, and the way from port to port has become standardized—in so far as it is possible to standardize anything so vast as Father Ocean.

There are, perhaps, a dozen principal trade routes, and many sea lanes, over which passes the never-ending procession of smoke-belching steamers and the few left-masted sailing ships that are still left on salt water. The steamer which goes on its way independent of the wind, and whose movements are determined largely by the desire of her owners to save time and fuel, sail a more direct course between ports than does the sailer, who often must wait for a favorable ocean current, or to avoid treacherous coasts where adverse winds might drive her ashore. Thus it is that trim sailing ships follow their own highways dictated by nature, and leave the grubby steamers to go their own way, besmirching sea and sky with black smoke, but rarely getting a chance to drop cinders and grime on the hystonated decks and white sails of the members of the old regime.—Joseph Leming in "Ships and Car-goes."

Sores Heal Quickly.—Have you a persistent sore that refuses to heal? Then, try Dr. Thomas' Eczettec Oil in the dressing. It will stop itching, carry away the proud flesh, draw out the pus and preserve a clean way for the new skin. It is a recognized healer among oils and numbers of people can attest that it healed where properly applied.

Reduce Size of Paper Money

Size of Paper Currency in United States to be Reduced by About One-Third

Reduction of the size of paper money by about one-third, beginning with the dollar has been authorized in the United States by Secretary Mellon. The present size of the paper currency is 7-16 by 2 1/2 inches. Assistant Secretary Dewey's accepted recommendation calls for a reduction to 4 1/2 by 2 1/2 inches, which is approximately the size of the Philippine currency.

The first new dollar bill of the smaller size will probably be turned out at the Bureau of Engraving and Printing within a few months but a supply will not be released to the public for about twelve months.

British Women Smoke More
A few years ago women organized anti-tobacco leagues, fought the use of the weed. Now, according to English physicians, the weaker sex is more intemperate than men in the use of cigarettes. Some women, they say, boast of smoking 50 cigarettes a day. Most of them use long holders in which nicotine accumulates and is swallowed in small quantities.

"Grandpa's a hundred and three years old today, doctor."

"Isn't that splendid! And does he read or do anything?"

"No, o' no, don't seem to have no ambition for nothing!"—Pearsone's Weekly.

Now claimant to the world's longest record is T. H. Ogilvie, who claims to be 147 years old. He is in good health and says he remembers events that occurred 125 years ago.

Invented Good-Paying Job

Englishman Tramps Around Country Typing Letters for Farmers

On tramp with a typewriter, doing letters for people on lonely farms and in out-of-the-way villages, is a job that an ex-serviceman has invented for himself in order to earn a living. He is Horace Woodford, a native of Otley, England, who was a clerk at Hull before joining the army, and afterwards was in turn, hop-picker, ship's stoker and fish hawker.

"I have been making a decent living for the past two years tramping round the country. From the early spring to the late autumn," he told an interviewer recently.

"I type letters for farmers and their servants, and when I strike any big public works I always find that the men—more especially the navvies—are glad to have the opportunity of having a letter typed for them."

"I have tramped all over England, Ireland and Wales, and now I am going to try Scotland. My charge for letters, long or short, is 12 cents. I must have typed thousands, including love letters."

"I never knew there was so much romance on the land. To hear some sailors looking for farmer folk telling their love story in the rough and ready language was a surprise to me."

"The girls always want a line or two of poetry, and as I have an old book of verse I am able to oblige them."

An Unusual Bequest

Toronto Man Left Something Better Than money to Children

A Toronto real estate dealer, who died recently, didn't leave his family very much money, but he bequeathed to his children some advice which, if acted upon, will prove to be much more valuable than gold or silver. In his last will and testament he declared that his fervent prayer was that all his "darling children" will embrace every opportunity to do good, to be kind and loving to all the human family.

If the beneficiaries of this advice ponder over it, and put it into daily practice, they will lay up for themselves eternal life in this life and in the life to come. They will be rich in the affection and regard of their fellowships. Like beggars like. If men manifest kindness and love toward the human family, they will receive the same in return.

Money is not everything. As Thompson has so well put it, "Kind hearts are more than coronets." So fathers who have little or no money to leave to their children may easily do a lot worse than this Toronto father who sought to bequeath to his offspring the spirit of kindness and of brotherly love.

Little Helps For This Week

Blessed are the pure in heart, for they shall see God.—Matthew v. 8.

The pure in heart God's face shall see;

And does not this include the whole celestial scale of promised bliss?

Can souls which His dear presence glow?

More joy attain?

Certainly as the open eye drinks in the light, do the pure-in-heart see God. And he that lives truly, feels Him as a presence not to be put by.

—Theodore Parker.

The pure in heart see God in everything, and see Him everywhere; and they are supremely blessed.

—John G. Holland.

A safe and sure medicine for a child troubled with worms is Mother Graves' Worm Exterminator.

Back-to-the-Land

A member of the Fellowship was a passenger on a steamship which was slowly sinking. The passengers were climbing into the lifeboats.

"Sir," suggested a reporter on board the ill-fated vessel, "here's a chance for some publicity. If you cared—"

"You may quote me as saying," replied the statesman, "that I am heartily in favor of a back-to-the-land movement."

Barnes—"I make my son practice four hours each day."

Rod—"Heaven, man, you'll make him into muscle so much that he will give it up."

Barnes—"Fine. That's just what I want."

Ease sunburn with Minard's Liniment.

The system of mass production was originated 200 years ago among the Ikon painters of Khoulou, a Russian village. By passing each Ikon through 100 hands, the village was able to turn out 2,000,000 each year.

Minard's Liniment is reliable.

Growth of Winnipeg

Is Now The Third Largest City In

Winnipeg is still the third largest city in Canada, according to figures furnished by the Board of Trade. Its population, including suburbs, is 234,646, as given in Henderson's Directory. Montreal and Toronto are, of course, well ahead of this figure, the former at a million and the latter at three quarters. City Hall records give the population of Winnipeg proper at 185,932, or a gain of 7,000 over a year ago. Vancouver comes next with about 160,000.

THAT BABY OF YOURS

Keep Him Well With the Aid of Baby's Own Tablets

No mother how strong and rosy your child may be he requires a laxative sometimes so that the stomach may be kept sweet and the system clean.

Formerly the laxative medicines given to children were disagreeable ones—castor oil, senna tea, powders and so on. But now Baby's Own Tablets, easily administered and pleasant to take, have superseded these. The children like Baby's Own Tablets.

Not only as a laxative but in many other ways these Tablets are an ideal remedy for little ones. They quickly reduce feverishness, relieve indigestion, colic and vomiting, prevent constipation, check diarrhoea, allay teething pains and promote healthy, natural sleep.

You can get Baby's Own Tablets at any dealer in medicine or at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

According to insurance company statistics quoted in an article in "Liberty," six is the age at which children are most likely to be killed by accident.

CAMPERS!

Take Minard's in your kit. Good for cuts, sprains, burns, and insect bites.

Government Will Share Cost of Urban Roads

With the gravelling of the major portion of the trunk highway from Edmonton to the Montana border within sight of completion this fall, the Provincial Government has been stirred to action in regard to the unfinished gaps existing in the highway through towns and villages along the route.

This situation was called to the attention of the Government some months ago by the Alberta Motor Association and the Department urged to contribute a share of the heavy cost of bringing these sections of the road through urban limits up to the standard of construction through the municipal districts in which the Federal Aid Act applied.

The Government has agreed to assume half the cost of such construction in the towns and villages and to further provide engineering services free. This will apply to all urban municipalities situated on any highway in the Province, and effect about 150 miles of roadway in all.

Premier to Visit Old Country

The attitude of British industry and capital toward further investment in Western Canada and the possibility of establishing closer relations between Great Britain and this province will be one of the matters investigated by Premier Brownlee in the course of a trip to the Old Country on which he expects to leave late in June. In addition to looking into the British emigration policy as it affects the province, the Premier will make extensive inquiries into the possibility of enlarging the market for Alberta products in the Old Land.

Pool To Build Coast Elevator

Construction will be started shortly, it is announced, on the 1,400,000 bushel elevator to be erected by the Alberta Wheat Pool at Vancouver, and it is expected that the big plant will be ready to handle grain from the 1927 crop.

Bounties For Wolf Pelts

Announcement of the bounties to be paid on wolves killed in the province is made by Game Commissioner, B. Lawton. The highest bounty is \$20 which will be paid for female timber wolves while male timber wolf pelts will command \$10. Adult prairie wolves taken between April 30 and September 1 will be paid for at \$2 a pelt and each wolf pup taken before July 1 will command \$2. While prairie wolf and wolf pup pelts upon payment of the bounty become the property of the provincial government, timber wolf pelts upon which bounty is paid are to be sold through the provincial government for marketing service and the proceeds, less the selling commission, will be paid to the person receiving the bounty.

Every farmer should have a bottle of Spooner's Remedy for Stock. A sure cure for all colics, inflammation, etc. Every bottle guaranteed. This remedy may be purchased at the Chinook Drug Store.
